

# Global Growth Portfolio

## Collective Portfolio Service (CPS)

June 2018

### OBJECTIVE

The CPS Global Growth Portfolio is a high risk active total return investment strategy. The portfolio will aim to provide a return in excess of the Asset Risk Consultants (ARC) Sterling Equity Risk Private Client (PCI) benchmark through the generation of both capital growth and income (total return) over a medium-to-long term investment horizon.

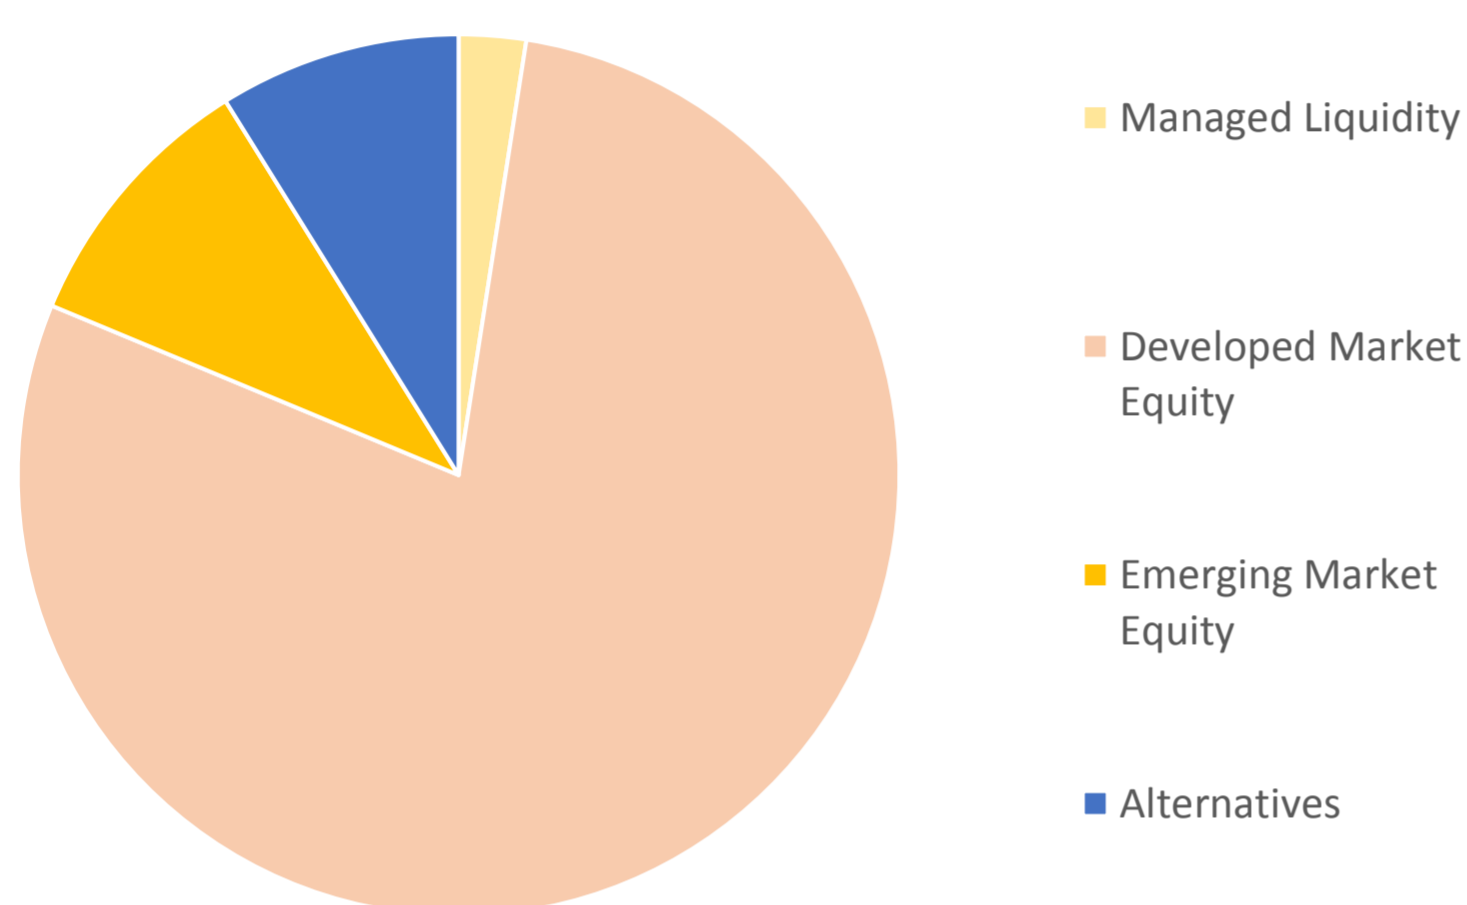

The investment strategy benefits from Bartholomew Hawkins Asset Management's (BHAM) proprietary asset allocation methodology. This identifies the optimal blend of asset classes for a given level of risk.

A quantitative screening tool ensures selection of only the most consistent alpha generating collective funds within a specific asset class and/or region.

### RISK-GRADED INVESTMENT STRATEGIES

Portfolio	Volatility Range	Risk
CPS Conservative	6% - 8%	Low
CPS Income	8% - 10%	Low/Medium

## MONTHLY COMMENTARY

The Global Growth investment mandate outperformed when compared to its benchmark during June. The mandate returned 1.00%, which was 1.40% above benchmark.

The main contributors to outperformance during June was our allocation to developed market equities and in particular our UK and US equity exposures. Our UK fund holdings significantly outperformed the FTSE 100 & FTSE All Share index over the time period. The main detractor to performance during June was our exposure to Emerging Market and Asian Equities.

The longer term growth potential from the Asian markets is still, we feel, very much stronger than the more moribund European economies driven by the key factors such as increasing population, rising standards of living and innovation. There is also, we feel, less political risk in Asia than the turbulent EU (Italy, Germany, Spain and Eastern Europe being notable cases). Based on this we decided to make a tactical switch in June to eliminate our European equity fund exposure and capitalise on gains made and build up our exposure to Asian markets at a relatively cheaper price.
